

## EXP – 7

230701248

### AIM:

Experiment with different layouts and color schemes for an app.

Collect user feedback on aesthetics and usability using GIMP(GNU)

Image Manipulation Program (GIMP)

### PROCEDURE:

Step 1:GIMP Set up

Step 2:Design the Basic Layout(Basic visual Structure)

Step 3:Add UI elements(To Access all Features)

Step 4:Colour and layout Change

Step 5:Users feedback

### Step 1:

- Download and Install: Download GIMP from GIMP Downloads and

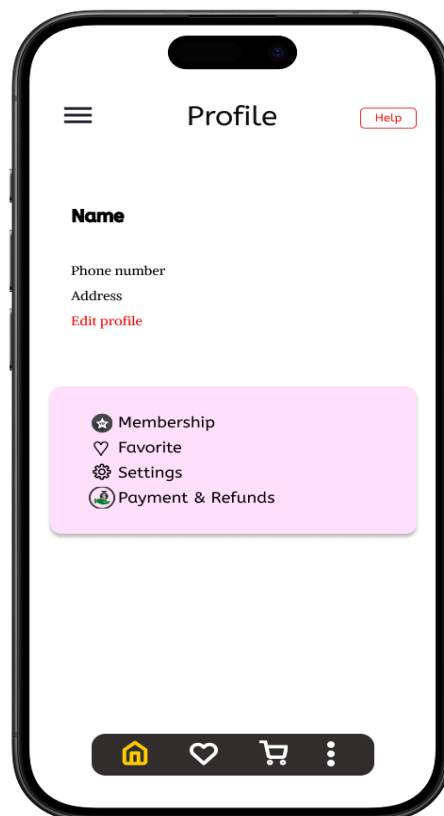

install it on your computer.

- Launch the GIMP application.

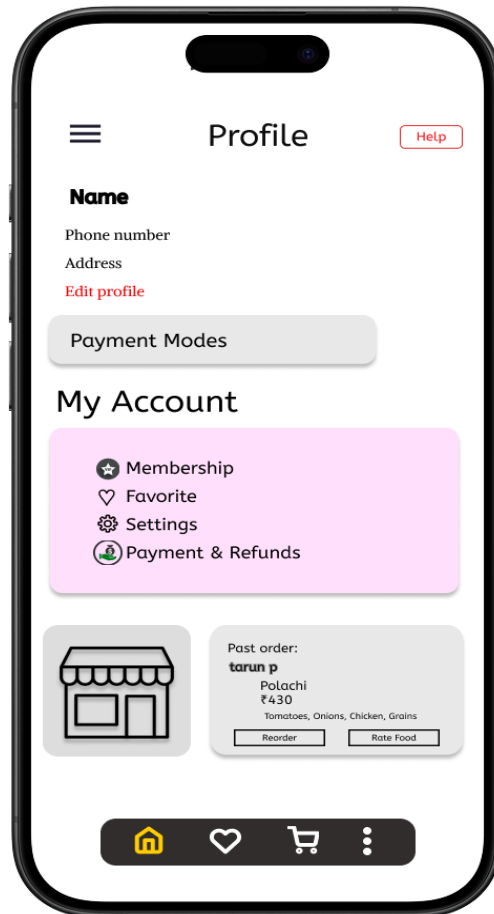

## Step 2:

### Create a basic layout:

- This is a simple web layout designed for the Crop to Cart basic profile page. It features a clean top navigation bar with a logo, user icon, and navigation links. Below that, the main profile section displays the user's profile picture, name, and contact details. The central content area dynamically updates to show the selected section. The layout is minimal and user-friendly, focused on easy profile management and smooth navigation.

- Then we update the above page with some more features and alignment to make more interaction possible and easy to use.

The using gradients and soft colors to enhance user experience. The colors will make the application more user friendly and fun to use

Step 3:

User feedback:

Feedback 1:

The interface can be more colorful and can be made attractive with relative colors

Design rating : 2/5

Labeling and text : 3/5

Total design: 2.5/5

Feedback 2:

The interface can have more centered alignment and there must be difference shown between various clickable and non clickable images

Design rating : 3/5

Labeling rating : 2/5

Total design: 3/5

Final output and changes based on feedback:
